## Commitment to achieving Net Zero

Riverside Environmental is committed to achieving Net Zero emissions by 2045.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the Base Year:

- Transitioning away from fossil-fuel powered fleet, 25% company vehicles are now either hybrid or fully electric.
- Hybrid and remote working practices embedded across the business, reducing commuting related emissions and associated business travel through increased use of video conferencing and flexible working arrangements.

The carbon emissions reduction achieved by these schemes equate to 15,57tCO<sub>2</sub>e, a 2.1% reduction against the Base Year.

### In the future we hope to implement further measures such as:

We intend to invest in the following initiatives within the next 3 years:

- Transition 90% of our vehicle fleet to electric by 2035
- Procure 100% of our electricity from renewable sources for all offices by end 2027 (as contracts allow).

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Protocol Standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
